carta

The most recent, relevant, and reliable salary and equity data

Make responsible compensation decisions, stay on budget, and communicate the true value of your compensation packages.

What does Carta offer?

Win talent within your budget

With the largest set of private company equity and salary data, Carta Total Compensation helps you set your recruiting budget and make data-driven decisions about which roles to hire and in which locations.

Extend your runway

With a direct cap table integration, you get relevant insights that guide you in making responsible compensation offers and prevent you from overspending on salary or equity.

Identify and address pay gaps

Your Company Scorecard responds to market conditions and helps you easily spot pay equity discrepancies and potential retention issues.

Communicate comp, equity, and upside

Show employees the full value of their compensation packages with Offer Letters and Total Rewards Statement.

“

We’re a small company and we know we can't compete on salary with larger organizations.

So, the data on equity compensation within Total Comp has been very important in helping us build a competitive compensation philosophy.

We're looking for people who want to build something and be part of something, and equity fully aligns incentives.
